

STUDENT GOVERNANCE

The Student Governance Organization (SGO) consists of all registered McWilliams School of Biomedical Informatics students in good academic standing. Any full-time student enrolled in a program at the school is eligible to become an elected representative of his or her program and will serve for one year.

The purpose of the Student Governance Organization is:

- to provide students of the school an organized feedback and advisory mechanism to the administration and faculty
- to provide students a mechanism by which they may have an impact on the decision-making processes
- to provide social, cultural and recreational activities for students of the school
- to provide representation to the UTHealth Houston Student InterCouncil

Additional information about the organization, its current officers and events can be found on the McWilliams School of Biomedical Informatics website (<https://sbmi.uth.edu/current-students/sgo.htm>).
