

# DDS DIDACTIC SUMMER (DENU)

---

Course descriptions in school catalogs and the Course Search (<https://catalog.uth.edu/course-search/>) are correct at the time of publication. See myUTH (<https://uthidp.uth.edu/nidp/saml2/sso/?id=Campus-Affiliate-LOA2-DUO&sid=0&option=credential&sid=0>) for more recent course information and to register for courses.

## **DENU 1561 Principles of Pharmacology (1 Credit)**

This course relates to the study of the basic principles of how the body responds to and reacts to administered agents. This course is composed of three subtopics: Pharmacodynamics, Pharmacokinetics, and Pharmacotherapeutics. 0-100 (DENT) Begin 2001D

## **DENU 1562 Local Anesthesia (1 Credit)**

This course is essential for the performance of a great majority of the clinical procedures students use in treating patients throughout a career. The goal is for students to learn the pharmacology and toxicology of dental local anesthetic drugs and the proper techniques for their administration. 0-100 (DENT) Begin 2001D

## **DENU 1703 Oral and Maxillofacial Radiology I (1.5 Credits)**

This course introduces students to the basic principles of oral and maxillofacial radiology. The radiographic examination plays an integral role in the diagnostic process in dentistry in conjunction with the clinical examination. Only those conditions and disease states which are detected by examination of the patient can be addressed. The preclinical laboratory sessions are designed to perfect the student's technical skills and familiarize them with the variability of normal radiographic anatomy. 0-100 (DENT) Begin 2001D

## **DENU 1704 Introduction to Clinic (1 Credit)**

This course introduces students to the clinical environment and familiarizes them with the steps in doing a comprehensive exam. This course guides students through the process necessary to collect information, interpret that information, and use it in formulating a diagnosis and develop a treatment plan. 0-100 (DENT) Begin 2001D

## **DENU 1721 Perio I: Introduction to Periodontology (1 Credit)**

This course introduces students to current classifications of periodontal diseases and fundamental knowledge of the epidemiology, etiology, microbiology and immunology of periodontal diseases. Basic information is integrated with necessary clinical skills to evaluate and diagnose all currently recognized forms of periodontal diseases. 0-100 (DENT) Begin 2001D

## **DENU 1931 Basic & Applied Nutrition (1 Credit)**

This course helps students acquire a basic understanding of human nutrition in the context of oral health and disease. The student should understand the links between nutrition, health, and disease and be able to apply the concepts learned in this course to patient diagnosis and treatment planning taught later in the curriculum. 0-100 (DENT) Begin 2001D

## **DENU 2624 Practice Management II (0.5 Credits)**

The goal of this course is for dental students to integrate the theoretical with the practical aspects of practice management. 0-100 (DENT) Begin 2001D

## **DENU 2811 Dental Anesthesiology (1 Credit)**

This course introduces students to the wide spectrum of pain and anxiety control in dentistry. Students establish a basic understanding of additional techniques available to the dental practitioner to cope with the problems of anxiety and fear common in patients. A large portion of this course concentrates on training of nitrous oxide inhalation sedation. 0-100 (DENT) Begin 2001D

## **DENU 3706 Differential Diagnosis-Soft Tissue (1 Credit)**

This course assists students in establishing a differential diagnosis for soft tissue pathoses occurring in the oral and paroral regions. This course is designed to present an orderly and sequential approach to the formulation of a working diagnosis. 0-100 (DENT) Begin 2001D

## **DENU 3707 Differential Diagnosis-Hard Tissue (1 Credit)**

This course assists students in establishing a working diagnosis based on the radiographic findings of patients affected by lesions or conditions involving the teeth, jaws, and adjacent oral anatomy. This course is designed to present an orderly and sequential approach to the formulation of a radiographic differential diagnosis. 0-100 (DENT) Begin 2001D
