CERTIFICATE IN HEALTH ECONOMICS

Overview

This certificate is intended to train students in the fundamentals of health economics, equip them in the use of economic tools to investigate pressing healthcare issues, and familiarize them with methods of economic evaluation and large data-based causal inference analyses. The certificate is designed for: clinical professionals such as physicians, dentists, nurses, and allied health professionals; graduate degree students pursuing any career in public health, biomedical sciences, healthcare, or health services; and non-degree students interested in health economics.

Credit Hours

12 semester credit hours

Availability

Available to degree-seeking and non-degree seeking students *(spring 2027 for non-degree seeking students).*
