

CERTIFICATE IN INTRODUCTION TO QUANTITATIVE METHODS FOR BEHAVIORAL SCIENCES

13 semester credit hours

Available to degree-seeking and non-degree seeking students.

This certificate provides introductory training in research design and quantitative methods relevant to practitioners and researchers working in the fields of health promotion, social and behavioral sciences and preventative medicine. The course offerings in this certificate are designed to provide an introduction to basic design and analysis concepts. This will be suitable for certificate students entering with little or no prior quantitative methods experience.
